

Embed Widget

Embed widget - read this first

Important: Pasting broken code or incorrect code into the embed widget may damage your site.

Only use the embed widget with Javascript that has been specifically written for embedding on third-party sites. Usually, such code will begin and end with `<script></script>` tags.

We do not support the following widget providers:

Longtail video "bits-on-the-run" player

Emailmeform.com form widget

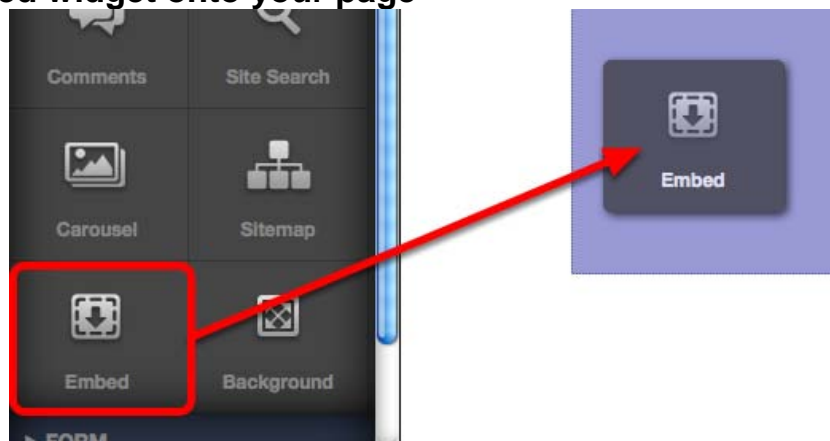

Use of code from these sites will result in your site becoming unavailable to edit.

Embed widget examples

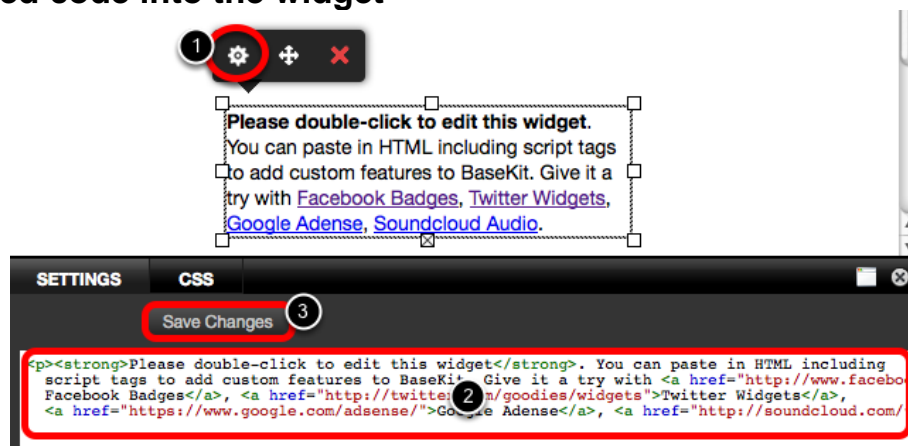

Example: [add a calendar widget](#)

Example: [add a Facebook badge](#)

Drag an Embed widget onto your page

Paste Embed code into the widget

Click on the **settings icon (1)**, paste the code **(2)** and click the **Save Changes button (3)**. Some widgets may only be visible after you enter preview mode and perform a browser refresh.

Warning: If you paste broken or incomplete code into the embed widget your site may become damaged.

The Embed widget is suitable only for use with embeddable Javascript, <iframe> or valid HTML.

Embed widget

The **Embed widget** allows third party Javascript widgets or <iframe> content to be placed on a page.
