

## Google Maps widget

### The Google Maps widget

Click the **Widgets** tab (1) and then drag the **Google Maps widget** (2) onto the page.

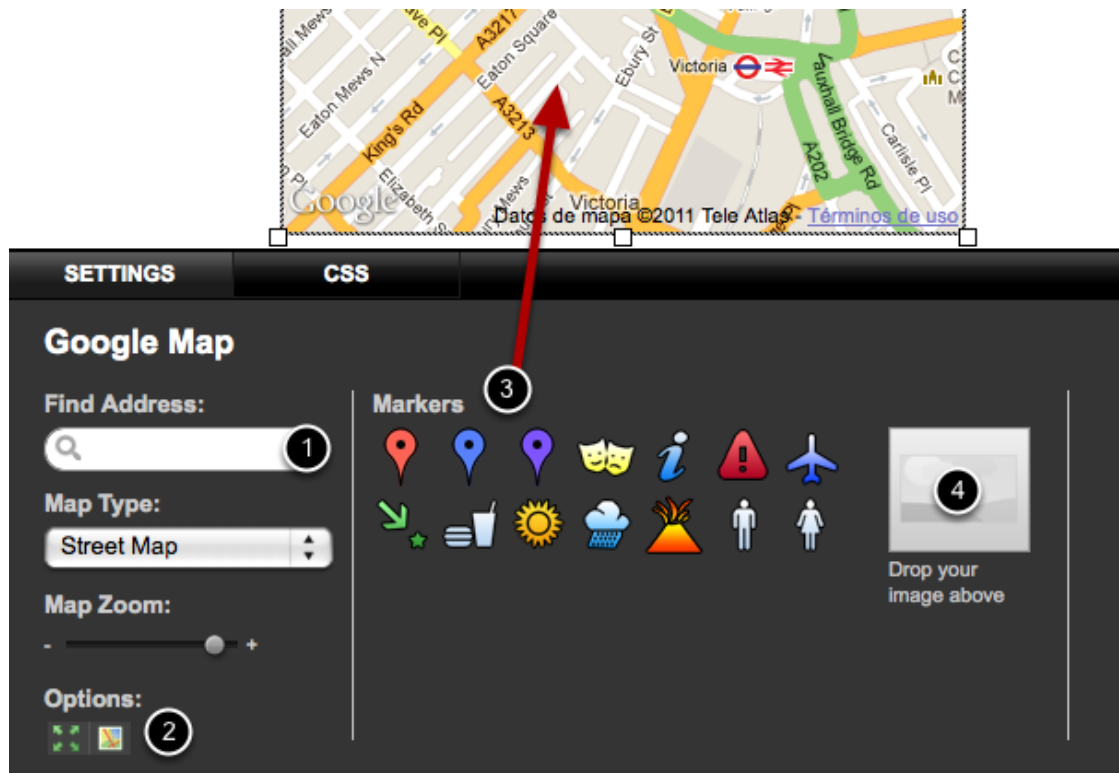

### Edit the Google Maps widget settings

You can drag the corner handles to resize the map.

Click the **edit icon** (1) to open the settings panel

## Settings

To centre the map on a given location, type the address into the **Find address** field (1) and press the return key on your keyboard. Hint: for non UK addresses try typing the country name in first and then pressing the return key on your keyboard to centre the map on a given country.

The **options buttons** (2) will add buttons to the map so the user can zoom and select map/satellite/hybrid views.

To add a pointer to the map, drag and drop a pointer on to the map (3). To add your own image to the map, drag and drop an image into the **drop target** (4) and then drag it from the pointer area (3) onto the map.
